## INVESTMENT OPPORTUNITY

FiCAS Selected Crypto Assets ETI allows qualified investors in Europe and retail investors in Switzerland, Germany, and Austria to profit from the modern, growing cryptocurrency market. Investors can benefit from several proven crypto assets and their development by participating in FiCAS Selected Crypto Assets ETI, while our trading experts keep a close eye on the development through active management to minimise downside risks.

## INVESTMENT STRATEGY

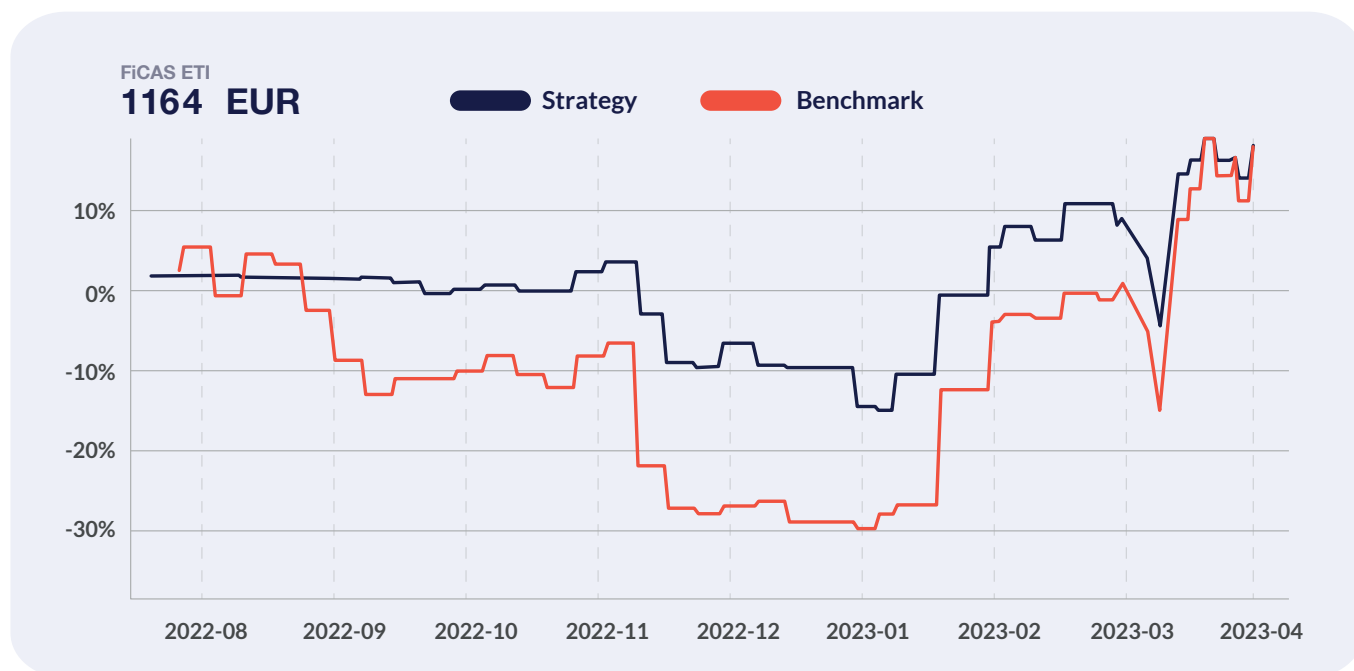

The investment objective of the ETI is to achieve long-term capital growth by investing in selected crypto assets. The allocation of assets is selected by the Investment Manager at its discretion and from the investment universe. The purpose of allocating funds to various crypto assets is to achieve the required level of diversification and growth of the portfolio. When managing the ETI, ideal entries and exits of the individual positions are monitored in particular, which are based on sound data from the research team. In doing so, FiCAS AG can not only trade the assets from one well-founded cryptocurrency to another but also relocate them to fiat. In this way, FiCAS AG wants to take advantage of market opportunities on the one hand and hedge against market downturns on the other.

## STRATEGY GUIDELINES & RESTRICTIONS

The Investment Manager allocates investable funds to pre-selected crypto assets, but also has the ability to reallocate to Euros if market conditions warrant. Assets may be adjusted and rebalanced at the discretion of the Investment Manager. The Investment Manager continuously scans the investment universe for opportunities based on the relative value of each asset to each other.
